

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Clark, pp. xxxv, 1187; Rules for a printed Dictionary Catalogue, Part II, by C. A. Cutter, pp. 89; Circular of Information No. 1, 1880, College Libraries as Aids to Instruction, by Justin Winsor and Otis H. Robinson, pp. 27; Circular of Information No. 1, 1881, Construction of Library Buildings, by William Poole, pp. 26; 1881, Library Aids, by Samuel Green, pp. 10; 1886, Statistics of Public Libraries in the United States, pp. 98, reprinted from 1884-85 Annual Report; 1886, Special Report New Orleans Exposition 1884-85, pp. 650-655; 1891, Rules for a Dictionary Catalogue, by Charles A. Cutter, pp. 140; third edition, with corrections and additions, reprinted from the 1876 special report; Circular of Information No. 7, 1893, Statistics of Public Libraries in the United States and Canada (in 1891), pp. 213; 1893, Catalogue of A. L. A. Library of 5,000 volumes, for a popular library, pp. 592; 1896, Papers prepared for the World's Library Congress, held at the Columbian Exposition, edited by Melvil Dewey, pp. 691-1014, reprinted from Annual Report 1892-93; 1897, Statistics of Public, Society, and School Libraries in the United States, and Library Legislation in the United States, being chapters viii and ix reprinted from the Commissioner's Report for 1895-96.

STATISTICS FOR 1900.

The number of public, society, and school libraries in the United States of 1,000 volumes and over is 5,383, according to reports collected by this Bureau in 1900. This shows an increase of 1,357 libraries in less than five years. The number of volumes in the 5,383 libraries was 44,591,851 as compared with 33,051,872 in the 4,026 libraries reported at the beginning of the year 1896, the remarkable increase of 11,539,979 volumes or almost 35 per cent in the five years.

The statistics of libraries for 1900 will be found summarized in tables 1 to 9 and the statistics in detail for each library will be given in the concluding pages of this chapter. Tables 10 to 14 reproduce the most important items in similar tables for 1875, 1885, 1891, and 1896.

Table 1 gives the number of libraries, the number of volumes, and the number of pamphlets reported from each State and shows the increase in number of libraries and volumes and the percentage of increase in volumes in each State and geographical division. The North Atlantic Division has 2,473 of the 5,383 libraries and a million more than half the number of volumes in the United States. New York alone has 718 libraries with 7,496,509 volumes; Massachusetts, 571 libraries with 6,633,285 volumes, and Pennsylvania, 401 libraries with 3,974,577 volumes.

The North Central Division has 1,728 libraries with 11,211,710 volumes. Illinois has 309 of these libraries with 2,472,710 volumes; Ohio, 266 libraries with 2,055,589 volumes, and Michigan, 193 libraries with 1,298,708 volumes.

The South Atlantic Division has 421 libraries with 5,303,237 volumes. Maryland has 80 of these libraries with 1,175,253 volumes, and the District of Columbia 74, with 2,504,783 volumes, one million of these being in the Library of Congress.

The South Central Division has 374 libraries with 1,886,731 volumes. Kentucky has 76 libraries with 425,729 volumes, and Tennessee, 77 libraries with 392,221 volumes.

The Western Division has 387 libraries with 2,779,596 volumes. California has 212 of these libraries with 1,781,858 volumes, and Colorado 54, with 363,866 volumes.

The last column of table 1 shows the per cent of increase in the number of volumes in each State since 1896. The per cent of increase for the whole country was almost 35; for the North Atlantic Division nearly 33; for the South Atlantic Division 32; for the South Central Division nearly 39; for the North Central Division almost 40, and for the Western Division about 38. Oklahoma shows the greatest per cent of increase, 379. The following States and Territories show percentages of increase above 100: West Virginia, Arkansas, Indian Territory, Oklahoma, North Dakota, South Dakota, and New Mexico.

Table 2 shows that of the 5,383 libraries, 3,036 had 209,412 periodicals in their reading rooms, 3,684 had added 2,156,992 volumes during the year, and 1,455 had added 549,326 pamphlets. The number of volumes issued for home use during the year by 2,405 libraries was 48,410,128, and the number issued for use in 783 libraries was 9,609,632.

Table 3 indicates the sources of support and the classification of the libraries reporting. Only 1,040 libraries occupy their own buildings; 592 occupy rented buildings. Of the 3,751 not answering the question in regard to this item, school, college, and other libraries occupying buildings or rooms rent free comprise the greater proportion. The number of libraries supported by taxation is 2,375 and the number by subscription, 2,870. Only 138 are reported as being supported by both taxation and subscription. The number reported as entirely free to the public is 2,734, the number free for reference only 1,735, and the number of subscription libraries 914. There are 447 libraries classed as circulating, 1,148 as reference, and 3,788 as both circulating and reference.

Table 4 shows a general classification of the libraries reporting. There are 1,979 general libraries, 1,725 school, and 689 college libraries. The remaining libraries are divided among 15 classes.

In Table 5 the libraries are classified according to size. There are 4 libraries having over 500,000 volumes each, 3 between 300,000 and 500,000, and 47 between 100,000 and 300,000. The number of libraries having below 5,000 volumes is 3,654.

Table 6 is a summary of the income of libraries from various sources, their endowments, value of buildings, and the amount expended for books during the year.

Very few librarians made complete reports, but the number reporting on each item is given in the table. Of the 5,383 libraries, 988 received \$2,213,715 directly from taxation, 1,016 received \$2,349,294 from State, county, or city appropriations, 714 received \$1,198,955 from endowment funds, 962 received \$448,130 from membership fees and dues, 294 received \$50,742 from book rents, 819 received \$551,522 from donations, and 1,474 received \$1,000,048 from sources not stated. The total income of 3,115 libraries was \$7,812,406.

The aggregate of the endowment funds reported by 645 libraries is \$25,267,643, and the value of buildings owned by 710 libraries is \$47,083,805. The amount expended for books during the year by 2,972 libraries was \$2,056,675.

It is shown in Table 7 that there is one library to every 14,118 people in the United States, and that there are 59 books to every 100 population. The North Atlantic Division has a library to every 8,510 persons, and the South Central Division a library to every 37,647 persons.

The District of Columbia has 899 volumes to every 100 of population; Massachusetts, 236; New Hampshire, 176; Connecticut, 170; Rhode Island, 163; Nevada, 157; California, 120; New York, 103, and Maine, 101 volumes to each 100 population.

Table 8 is a summary of the statistics of 3,878 public, society, and school libraries of 300 volumes and over and less than 1,000 volumes. These libraries have 2,018,658 volumes. The number of libraries free to the public included in the above number is 2,611; free for reference, 684, and subscription, 619. Of the total number, 3,189 are school libraries, 88 college, 382 general, and 219 other libraries.

In Table 9 are combined the statistics of Tables 1 and 8. The number of libraries having 300 volumes and over is 9,261, and the number of volumes in these libraries 46,610,509. This is a gain of 2,077 libraries and 12,014,251 volumes since 1896.

Tables 10, 11, and 12 are comparable with Table 9, giving the statistics of libraries of 300 volumes and over for 1875, 1885, and 1896.

Tables 13 and 14 are comparable with Table 7, giving the statistics for 1891 and 1896. In 1891 the number of volumes to every 100 people was 41, in 1896 the number was 47, and in 1900 the number of volumes to the 100 population was 59.

Table 15 is comparable with Table 1. It gives the statistics for 1896, showing that from 1891 to 1896 there had been an increase of a little over 27 per cent in the number of volumes. Table 1 shows the remarkable increase of nearly 35 per cent between 1896 and 1900.

Following the fifteen tables of summarized statistics already mentioned will be found the list of the 5,383 libraries of 1,000 volumes and over reporting to this Office in 1900. It is not claimed that none have been omitted, but certainly every reasonable effort was made to obtain a complete list. The Office had a trial list of over 12,000 names of libraries. To many of these libraries a second, third, and fourth request for information was sent, requiring the use of more than 20,000 blank forms. After classifying the returns, it was found that 5,383 libraries had 1,000 volumes or over, 3,878 had 300 volumes and over, but less than 1,000, while several thousand had less than 300 volumes each. From several hundred no information could be obtained. Some libraries printed in the list for 1896 failed to make any report for 1900. In such cases letters of inquiry were addressed to the postmasters, and wherever the library was found to be still in existence its name was retained in the list and the 1896 statistics repeated.

In every Annual Report from 1867-68 to the present year has appeared information relating to college and school libraries, and periodically the Bureau has published detailed statistics of public libraries. The Annual Report for 1870 contained a list of 161 principal libraries not including college libraries. The Report for 1872 contained a list of 1,080 libraries of 1,000 or more volumes. A special effort was made in 1875 to obtain a list of all the libraries in the United States having 300 volumes and over. The list as printed in the Report for that year included 3,848 libraries, and of

these 2,039 had 1,000 or more volumes. This list was also published in the great special report issued by this Office in 1876. That report was a volume of about 1,200 pages devoted to "Public libraries in the United States of America, their history, condition, and management." The volume contained 39 chapters by as many as twenty eminent specialists in subjects relating to libraries. In the Annual Report for 1884-85 was published a list of 5,338 libraries of 300 or more volumes; 2,988 of these libraries had 1,000 or more volumes. This list was reprinted in a pamphlet of about 100 pages. A valuable chapter of about 70 pages appeared in the 1886-87 report devoted to "Libraries in the United States." The statistics of 1,779 libraries were published in seven tables, classified as follows: (1) Free public lending libraries, (2) free public reference libraries, (3) free public school libraries, (4) free corporate lending libraries, (5) libraries of clubs, associations, etc., (6) subscription corporate libraries, and (7) circulating libraries proper. In 1893 this Bureau published 20,000 copies of a circular of information of 213 pages, giving the statistics of 3,503 public libraries in the United States having 1,000 volumes and over. The statistics collected were for the year 1891. Also in 1893 the Bureau published 20,000 copies of "Catalogue of A. L. A. Library, 5,000 volumes for a public library selected by the American Library Association and shown at the World's Columbian Exposition." So great was the demand for this publication that a second edition was printed in 1896. This special report contained about 600 pages. The papers prepared for the American Library Association for its annual meeting held at Chicago in 1893, and read before the World's Library Congress at the Columbian Exposition, were printed in the Education Report for 1892-93. These papers, which were prepared by about twenty leading members of the association, occupy 324 pages of the above-mentioned Report, pages 691-1014. A small edition of the matter was reprinted in a separate pamphlet. One of the most popular publications of this Bureau is Cutter's Rules for a Dictionary Catalogue, which was published in 1876 as Part II of the special library report of that year. The third edition was published in 1891 in a pamphlet of 140 pages. The special report issued by this Bureau in 1886 on "Educational Exhibits and Conventions at the World's Industrial and Cotton Centennial Exposition, New Orleans, 1884-85," contained much valuable matter in relation to libraries. This report is now out of print, as are all the earlier reports above mentioned. In addition to the statistics of college and school libraries published every year in the Annual Reports of this Bureau since 1870, many of the Reports have contained valuable facts concerning libraries in foreign countries. This is particularly true of the Reports from 1888-89 to 1899-1900.

Increase of population and growth of libraries in 25 years.
